An update on constructing the Force 10 system

Date Raised: Monday, 1 February 2010

By: R Gittins

Floor Skirting Block changed from timber to steel

To remove cutting the timber sections and wastage / time on site and to reduce timber content in the system the skirting block is now a folded steel section. This is supplied in 130mm long section. To install place adhesive (sausage tube 1.5kg) on base, to glue to floor/slab and compress and spring clip into place at the base of the panel - see attached photo of installation.
